Issued August 12, 2010

State Wheat Production Forecast Remains at 128.7 Million Bushels

OKLAHOMA:

The first production forecast of the year for the State's summer-grown crops based on August 1 conditions, shows an increase from last year's production with the exception of sorghum according to the Oklahoma Field Office of USDA-NASS.

Wheat production is forecast at 128.7 million bushels, unchanged from last month but up 67 percent from last year's production. An average yield of 33 bushels per acre is expected from 3.9 million harvested acres.

Production of **corn for grain** is forecast at 43.2 million bushels, is up 29 percent from last year. An average yield of 135 bushels per acre is expected from 320,000 harvested acres.

Cotton production is forecast at 340,000 bales, up 7 percent from last year. An average yield of 816 pounds per acre, is expected from 200,000 harvested acres.

Production of **grain sorghum** is forecast at 11.4 million bushels, down 7 percent from 2009. An average yield of 52 bushels per acre is expected from 220,000 harvested acres.

Peanut production is forecast at 52.5 million pounds, up 22 percent from last year. An average yield of 3,500 pounds per acre is expected from 15,000 harvested acres.

Soybean production is forecast at 13.2 million bushels, up 9 percent from 2009. An average yield of 30 bushels per acre is expected from 440,000 harvested acres. If realized this will be the highest production of soybeans on record for Oklahoma.

Production of all **hay** is forecast at 5.92 million tons, up 12 percent from last year. Alfalfa production, at 1.06 million tons, is up 14 percent from 2009. Production of all other hay is forecast at 4.86 million tons, and is up 12 percent from last year.

UNITED STATES:

Production of **all wheat** is placed at 2.26 billion bushels, is up 2 percent from the July forecast and up 2 percent from 2009. Yield is forecast at 46.9 bushels per acre, up 1.0 bushel from last month and 2.5 bushels above last year. If realized this will be the highest yield on record, 2.0 bushels above 2008.

Corn production is forecast at a record high 13.4 billion bushels, up 2 percent from the previous record set in 2009. Yields are expected to average a record high 165.0 bushels per acre, up 0.3 bushel from last year's record of 164.7.

All **cotton** production is forecast at 18.5 million 480-pound bales, up 52 percent from last year's 12.2 million bales. Yield is expected to average 837 pounds per harvested acre, up 60 pounds from 2009.

Production of **grain sorghum** is forecast at 383 million bushels, up slightly from 2009. Yield is forecast at 74.1 bushels per acre, up 4.7 bushels from last year.

Peanut production is forecast at 4.04 billion pounds, up 10 percent from last year's crop. Yields are expected to average 3,204 pounds per acre, down 208 pounds from last year.

Soybean production is forecast at 3.43 billion bushels, up 2 percent from last year. Yields are expected to average 44.0 bushels per acre from 78.0 million harvested acres, 2 percent more acres than 2009.

Alfalfa production is forecast at 72.5 million tons, up 2 percent from last year. Yields are expected to average 3.49 tons per acre from 20.7 million harvested acres. Production of **other hay** is forecast at 81.4 million tons, up 7 percent from last year. Yields are expected to average a record high 2.09 tons per acre from 38.9 million harvested acres.
